

About SAMS

Student Academic Management System could not have started this journey into the veins of administrative tasks of an academic institution without the inclusion of the under-listed vital features. This system is called as Student Academic Management System (SAMS). Student Academic Management System manages the student information by accepting adding, modifying or removing (i.e. processing) information and generating reports.

Student Academic Management System captures the student attendance, marks scored in tests, class timetable and previous education qualification. It is integrated so that student, parents and faculties can share this vital information of student's academic activities. Access to real-time information is vital for making informed, data driven decision, both by the teachers, Faculties, school administrators and the parents to improve student achievement.

Technology and its role in supporting the work of admissions students in higher education colleges have been explored in three recent studies. The studies found that good practice exists in the areas of supporting learners through the application process, providing feedback to applicants and monitoring the process for fairness purposes. Technology already plays a crucial role in communication, but institutions would benefit from additional tools to help them in these tasks. Almost all applications to higher education for Colleges Admissions Service will be made online, and college will receive data electronically. Use data and information in a variety of ways to support the pre-application and admissions process, and advice and guidance colleagues in the colleges use information provided by SAMS to help students to make the best choices of course and institution, and guide them through the application process. Data are used varies widely from very limited to relatively sophisticated. Admission to higher education is an area of great public interest and has been the subject of a number of recent national reviews and reports. The key concern is that all those who could benefit from education are given a fair chance to access the course and institution that best fits with their learning, career and life goals.

The need for applicants to have access to timely and accurate information about courses and their entry requirements, to know how they will be assessed, and then to receive feedback in the event of being unsuccessful in their application; ensuring that admissions practices are professional and fair.

SAMS is an endeavor to provide an interactive platform for the creation, absorption, dissemination and usage of knowledge for the well being of the student and the stakeholders. The system attempts to bridge the gap between the students by creating innovative channels of communication.

SAMS provides the mechanism for accurately and flexibly monitoring all the process in a college basically related to student. The system will provide role and right based access to its stakeholder like students, teachers and parents. It enables modes of access and tailoring for different groups of users, and supports a range of off-line access facilities. The system provides personalized access to the Institution from anywhere. with facility to capture all academic information it contains student registration, information, their trade, exam performance, colleges belong to, year of enrollment and completion, etc. The beauty of the system is it work will work both online and offline mode aims at Information are increasingly communicated in electronic form and never dependent on 24X7 mode of internet connectivity.

It consists of functionality such as automated enrolment and enrolment variations, providing academic advices based on the student's personal profile and interests, creating study plan for the student according to his/her current stage, calculating credits and final signing off. To improve the student achievement, therefore the Student Academic management System is needed.

Student Admission Management System(SAMS) aims at a paradigm shift of the entire process. SAMS aims to provide solution which is Citizen Centric, Transparent, Hassle Free and Economical.

The existing process of admission is not re-invented; it is re-engineered. Centralized admission of students Junior colleges throughout the state in phased manner. Pilot project in 2009-10 would however constitute 60 Junior colleges only, consisting of 50 governments and following 9 aided Junior colleges.
